

# Corey Summa | Software Developer

Austin, TX | (610)401-5235 | [CoreySumma@gmail.com](mailto:CoreySumma@gmail.com) | [Portfolio](#) | [Github](#) | [LinkedIn](#)

---

## Skills

Javascript, Python, HTML, CSS, Node.js, Django, React, Agile Methodology, Express, Mongoose, MongoDB, PostgreSQL, AWS, Bootstrap, OOP, Git/Github, GSuite, JSON, RESTful API's

---

## Summary of Qualifications

- Passionate Developer with experience designing, developing, and deploying applications through various languages, libraries, and frameworks.
  - Effectively contributing to iteration software development processes and enhancing product quality within an Agile environment.
  - Exceptional collaborative and communication skills, adept at working effectively with others.
- 

## Projects

### **MiState** (HTML, CSS, Javascript, Express, React , Node.js, MongoDB)

*Developed and deployed a full MERN stack digital journal app that logs a user's emotional state with each journal entry they create.*

- Full CRUD capabilities on entries.
- Dynamic rendering of emotions and entries by day, in a simple, easy to read format.
- Utilization of RESTful API routing and AJAX requests.

### **Game Shelf** (HTML, Bootstrap CSS, Python, Django, PostgreSQL, AWS)

*Developed and deployed an application so that gamers can keep track of progress of games they own.*

- Full CRUD capabilities on games and progress.
- Implementation of AWS S3 bucket for images to be stored for each game.
- Data persisting on PostgreSQL database.

### **[codemonk]** (HTML, Bootstrap CSS, Python, Django, PostgreSQL)

*Collaboratively developed and deployed a Django app where students of General Assembly's class can come together and learn from one another by posting coding challenges.*

- Full CRUD capabilities on posts and comments.
- Implementation of a like/unlike button for each user on specific comments/solutions.
- Embedded code sandbox playground so users can test their code.

### **SpotLabs** (HTML, CSS, Javascript, Node.js, Express.js, MongoDB, Google Oauth2)

*Developed and deployed a full CRUD application for users to collaborate on music playlists by posting songs by embedding Spotify onto the page.*

- Full CRUD capabilities on playlists and songs.
  - Embedded Spotify links for songs to be displayed.
  - Login capabilities utilizing Google Oauth2.
- 

## Experience

*Full Stack Developer, Personalized AI - Austin TX, Remote - Apr 2023 - Current*

### **(HTML, CSS, Javascript, Python, Django, mySQL, Apache, Generative AI, Apache, Git)**

- Developed new features independently and collaboratively within an Agile environment.
  - Elevated final product by conceptualizing innovative ideas to enhance UX.
  - Implemented new UI for an enhanced user-experience, utilizing various technologies.
- 

## Education

- General Assembly, Los Angeles, CA, Dec 2022  
Certificate in *Software Engineering*
- Delaware County Community College, Aug 2009  
Associates Degree *Liberal Arts*
