

Corey Summa | Full Stack Software Engineer

Austin, TX | (610)401-5235 | CoreySumma@gmail.com | [Portfolio](#) | [Github](#) | [LinkedIn](#)

Skills

Javascript, Python, HTML, CSS, Node, React, Django, Express, Mongoose, MongoDB, PostgreSQL, Bootstrap, Trello, Git/Github, GSuite, CLI

Summary of Qualifications

- Innovative Full Stack Developer with experience effectively planning, creating, and deploying applications from concept to product.
 - Passionate team player adept at effectively resolving complex problems with elegant solutions.
 - Strong collaborative skills, and excellent written and verbal communication.
-

Projects

SpaceMan (Vanilla Javascript, CSS, HTML)

Developed a simple word guessing game that generates a random word. The user has five chances at guessing a letter within it.

- Initialized the game's state and continued to change it synchronously with each guess of the user.

SpotLabs (Javascript, Node, Express, Mongoose, MongoDB, Google Oauth, CSS, HTML)

Developed and deployed an Express app where users collaborate together on playlists by embedding spotify links.

- Implementation of Google Oauth so each user can contribute to a playlist separately and user's can see a contributor's avatar.
- Full CRUD capabilities.

[codemonk] (Python, Django, Javascript, CSS, HTML, CSS, HTML)

Collaboratively developed and deployed a Django app where students of General Assembly's class can come together and learn from one another by posting coding challenges.

- Full CRUD capabilities on songs and playlists.
- Implementation of a like/unlike button for each user on specific comments/solutions.

MiState (CSS, HTML, Mongoose, Express, React, Node)

Developed and deployed a full MERN stack app that logged a user's emotional state with an entry for each day they logged their state.

- Full CRUD capabilities on entries.
 - Dynamic rendering of emotions and entries in a simple, easy to read format.
 - Renders the state of the user by week, organizing each entry by day.
-

Experience

Server/Trainer, Rocco's At The Brick - Newtown PA

Aug. 2020 - Oct. 2022

- Successfully managed and anticipated guest needs in high end/high volume restaurant.
 - Coordinated with other staff members successfully to provide a memorable experience.
 - Directly assisted with managerial duties i.e conflicts, planning, scheduling business meetings, and troubleshooting software issues internally.
-

Education

- General Assembly, Los Angeles, CA, Dec 2022
Certificate in *Software Engineering*
- Delaware County Community College, Aug 2009
Associates Degree *Liberal Arts*
